TRANSCERVICAL ASPIRATION INSTRUMENT

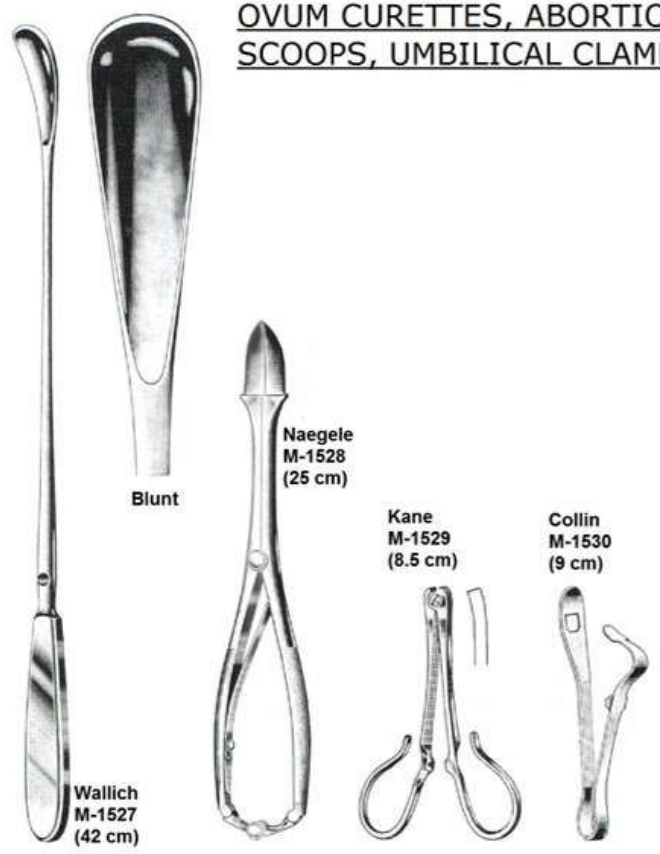

**Advantages**

- Optimal visibility with Ultrasound
- Less traumatic because of bulb-shaped end
- Even when strongly flexed the obturator is extremely easy to remove.
- After removal of the obturator, the catheter is still easy to manipulate in all directions.
- The placental area is easily accessible due to softness of the catheter even in case of an unfavourable position of the uterus.
- Cost is minimal due to durability & reusability.
